AMENDMENTS TO THE CLAIMS

- 1. (Currently Amended) A method comprising:
 - storing content on a portable memory device, said content including an image captured using a recorder/playback device;
 - detaching the portable memory device from the recorder/playback device; and displaying the image on the portable memory device while the portable memory device is
 - displaying functional controls for the recorder/playback device while the portable memory device is connected to the recorder/playback device.
 - 2. (Canceled).
- 3. (Previously Presented) The method according to Claim 1 further comprising transmitting the content from the recorder/playback device to the portable memory device.

detached from the recorder/playback device; and

- 4. (Previously Presented) The method according to Claim 1 further comprising selecting the image for display on the portable memory device.
 - 5-6. (Canceled).
- 7. (Previously Presented) The method according to Claim 1 further comprising selecting a mode to display the image, wherein the mode includes displaying the image as part of sequentially displaying multiple pieces of content.

- 8. (Previously Presented) The method according to Claim 1 further comprising selecting a mode to display the image, wherein the mode includes displaying the image as part of simultaneously displaying multiple pieces of content.
- 9. (Original) The method according to Claim 1 wherein the recorder/playback device is a digital camera.
- 10. (Original) The method according to Claim 1 wherein the recorder/playback device is a video camera.
- 11. (Original) The method according to Claim 1 wherein the recorder/playback device is an audio recorder/player.
- 12. (Original) The method according to Claim 1 wherein the recorder/playback device is a computer.
- 13. (Previously Presented) The method according to Claim 1 wherein the recorder/playback device is a television.
 - 14-21. (Canceled).
- 22. (Currently Amended) The method of Claim 1, wherein the portable memory device displays functional controls for the recorder/playback device while the portable memory device is connected to the recorder/playback device, said functional controls include soft keys that are particular to the recorder/playback device.

- 23. (Previously Presented) The method of Claim 1, wherein the portable memory device is configured to include an attachment area, said attachment area including a magnet for attaching the portable memory device to a metallic object, such that the portable memory device displays the image while attached to the metallic object.
- 24. (Currently Amended) A portable memory system, comprising:

 interface means for connecting to and detaching from a recorder/playback device;

 storage means for storing content including an image captured using the recorder/playback device; and

display means for displaying the image while the portable memory system is detached from the recorder/playback device; and

the display means is configured to display functional controls for the recorder/playback device while the portable memory device is connected to the recorder/playback device.

- 25. (Previously Presented) The portable memory system of Claim 24, wherein the display means is configured to display functional controls for the recorder/playback device while the portable memory device is connected to the recorder/playback device, said functional controls include soft keys that are particular to the recorder/playback device.
- 26. (Previously Presented) The portable memory system of Claim 24, further comprising:

an attachment area, including a magnet for attaching the portable memory system to a metallic object, such that the display means displays the image while the portable memory system is attached to the metallic object.

- 27. (Previously Presented) The portable memory system of Claim 24, wherein the interface means connects to and detaches from the recorder/playback device via a wireless connection.
- 28. (Previously Presented) The portable memory system of Claim 24, wherein the image is displayed as part of sequentially displaying multiple pieces of content.
- 29. (Previously Presented) The portable memory system of Claim 24, wherein the recorder/playback device is a digital camera.
- 30. (Previously Presented) The portable memory system of Claim 24, wherein the recorder/playback device is a computer.
- 31. (Currently Amended) A portable memory device, the portable memory device comprising:

an interface, which connects to and detaches from a recorder/playback device;

a memory, in operative communication with the interface, which stores content including an image captured using the recorder/playback device; and

a display, in operative communication with the memory, which displays the image while the portable memory device is detached from the recorder/playback device; and

the display is configured to display functional controls for the recorder/playback device while the portable memory device is connected to the recorder/playback device.

32. (Previously Presented) The portable memory device of Claim 31, wherein the display is configured to display functional controls for the recorder/playback device while the portable

Docket No.: SOA-0387

memory device is connected to the recorder/playback-device, said functional controls include soft keys that are particular to the recorder/playback device.

33. (Previously Presented) The portable memory device of Claim 31, further comprising: an attachment area, including a magnet for attaching the portable memory system to a metallic object, such that the display means displays the image while the portable memory system is attached to the metallic object.
